PRESENTATION AGENDA

- 
- 1 Introduction/
Welcome
 - 2 Key Themes/
Overview
 - 3 Innovations/
Technology
 - 4 Case Studies/
Impact
 - 5 Conclusion/
Q&A

ABSTRACT MODERN TECH

Presentation Content

- The Chameleon Inspiration
- Uniform Concept
- Smart Materials Used
- Reason for Materials
- Dimensions & Specs
- Conclusion

The Chameleon's Secret

- Special skin cells called iridophores.
- Contains tiny nano-crystals.
- Changes space between crystals.
- Reflects different colors of light.

Adaptive Uniform Concept

- Clothes change color automatically.
- Blends with surrounding environment.
- Provides ultimate stealth.
- Real-time color adaptation.

Smart Materials Used

05

Photonic Crystals

Nanostructures mimicking real chameleon skin.

Thermochromic Dyes

Heat-sensitive color changing compounds.

Photochromic Inks

Light-sensitive responsive pigments.

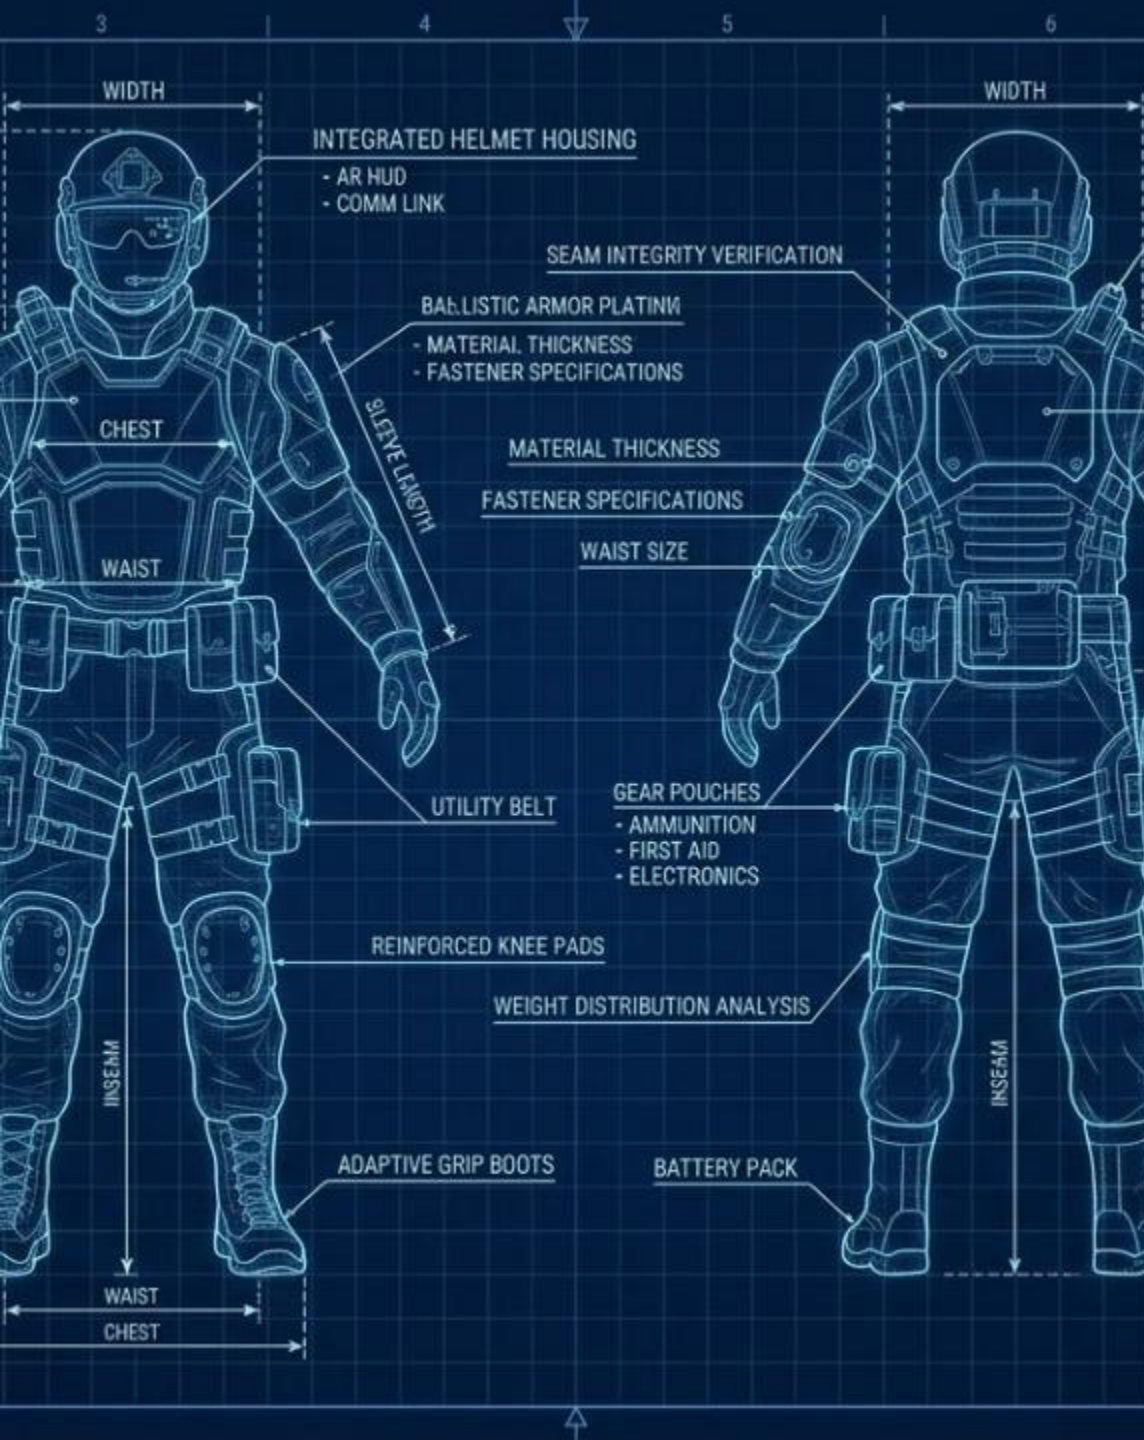

Conductive Threads

Flexible wires for electronic control.

Why These Materials?

- Crystals act like real chameleon skin.
- Dyes react fast to sun and heat.
- Threads allow electronic control.
- Lightweight, flexible, and washable.

Uniform Dimensions

Standard Sizes

Tactical fit (S, M, L, XL).

Weight Limit

Under 1.5 kg for full suit.

Fabric Thickness

2mm smart fabric layer.

Power Source

Micro-battery (5V) in belt.

The Future of Stealth

Nature provides the best technology.

Next-generation safety for defense.

Thank you!
