

THE  
GREAT  
PYRAMID  
OF GIZA

The image is a promotional poster for a film about the Great Pyramid of Giza. The title 'THE GREAT PYRAMID OF GIZA' is centered in a large, golden, serif font. Above the word 'THE' is a golden winged emblem. The background features a wide-angle shot of the Great Pyramid of Giza and the Great Sphinx at sunset. The sun is low on the horizon to the left, casting a warm, golden glow over the scene. The sky is filled with scattered clouds. In the foreground, the base of the pyramid and the Sphinx are visible, with many small figures of people walking around to provide a sense of scale. The Sphinx is on the right side of the frame, looking towards the left. The pyramid is the central focus, with its massive stone blocks clearly visible. The overall mood is majestic and ancient.

# THE GREAT PYRAMID OF GIZA

## OVERVIEW

The Great Pyramid of Giza is the most famous monument of Ancient Egypt.

Located on the Giza Plateau near modern Cairo.

Built during the reign of Pharaoh Khufu (Cheops) around 2589–2566 BCE.

It is the last surviving Wonder of the Ancient World.

Served as the royal tomb of King Khufu and symbolized his eternal journey to the afterlife.

## KEY FACTS

Built approximately  
**2560 BCE**

Construction took  
**about 20 years**

UNESCO  
World Heritage Site

One of history's  
greatest engineering  
achievements

# SHAPE & DIMENSIONS

## DIMENSIONS

Original height:  
**146.6 meters**  
(479 feet)

Base length::  
**230 meters**  
(754 feet) on each side

Built using over  
**2.3 million**  
limestone and  
granite blocks

Average stone weight:  
**2.5–3 tons**

Some granite blocks  
weigh over **60 tons**

# POSITIONS

## King's Chamber

The final resting place of Pharaoh Khufu.

## Queen's Chamber

Located below the King's Chamber.

## Grand Gallery

A tall, sloping passage leading to the King's Chamber.

## Internal Passageways and Shafts

A complex network of passages and shafts, some believed to have astronomical alignments.

# MATERIALS

## Nummulitic limestone

- Soft material
- It has good durability

## White Tura limestone

- It has shiny surface

## Aswan granite

- It has high compressive strength
- It has good durability
